Professional Summary

B.Tech Computer Science and Engineering student focused on software development, web applications, and AI-powered solutions. Experienced in building practical projects using Python, JavaScript, HTML, and CSS, including coding platforms, AI-based career guidance applications, and responsive web experiences. Strong foundation in data structures, problem solving, data analysis, and application development, with a focus on usability and real-world impact.

Projects

CodeMaster

Python — JavaScript — HTML — CSS

- Built a coding-focused web platform designed to help students practice programming and strengthen technical skills through an interactive learning experience.
- Applied programming and web development concepts to create a practical, user-focused digital solution for technical skill development.

AI Career Guidance Platform

AI Applications — Web Development

- Developed an AI-powered platform supporting students with career and placement preparation through resume analysis, career guidance, and job-related insights.
- Designed the application around practical student needs, combining technology and structured information to support career decision-making.

Personal Portfolio Website

HTML — CSS — JavaScript

- Designed and developed a professional portfolio website to present projects, technical skills, certifications, and achievements in a structured format.
- Focused on responsive presentation, usability, and clear organization of professional information.

Technical Skills

Programming: Python, JavaScript

Web Development: HTML, CSS, Web Development

Core Skills: Data Structures, Problem Solving, Data Analysis

AI: AI Applications, Machine Learning Fundamentals

Education

Kakinada Institute of Engineering and Technology

September 2023 – July 2027

Bachelor of Technology in Computer Science and Engineering, Artificial Intelligence

Certifications

- **Foundation of Modern Machine Learning** – FMML Certification
- **Introduction to Programming Using Python** – Infosys Springboard
