Built CodeMaster & AI Career Guidance Platform | Software
Developer | Python | JavaScript | B.Tech CSE | AI & Web
Development

Kakinada, Andhra Pradesh, India

Summary

I am a B.Tech CSE final-year student and Software Developer focused on building practical web and AI-powered solutions using Python, JavaScript, HTML, and CSS. I build responsive applications with a strong focus on usability, problem-solving, and real-world impact.

- **CodeMaster:** Built a coding-focused platform designed to help students practice programming and strengthen their technical skills through an interactive web experience.
- **AI Career Guidance Platform:** Developed an AI-powered platform that supports students with career and placement preparation through features such as resume analysis, career guidance, and job-related insights.
- **Portfolio Website:** Designed and developed a personal portfolio website to showcase my projects, skills, certifications, and achievements in a structured and professional manner, highlighting my development journey and technical capabilities.
- **Applied Python, JavaScript, HTML, and CSS** across academic and personal projects to develop functional and user-focused applications.
- **Strengthened** my technical foundation through FMML Certification and Infosys Springboard, gaining practical exposure to modern technology and problem-solving.
- **Use creativity and structured problem-solving** to turn ideas into useful digital solutions.

Technical Skills: Python | JavaScript | HTML | CSS | Web Development | AI Applications | Problem Solving

Education & Certifications: B.Tech – Computer Science and Engineering | FMML Certification | Infosys Springboard

I am ready to contribute as a Software Developer, apply my project experience to real-world challenges, and continue building impactful software solutions.

Education

Kakinada Institute of Engineering and Technology
Bachelor of Technology - BTech, Artificial Intelligence(CSE) · (September
2023 - July 2027)
